Professional summary

Senior frontend engineer with nine years building web applications, the last seven in React, currently at ASICS Apps (Race Roster). Built a shared component library from scratch and maintain a 40+ component library and Storybook. Implemented state management across microfrontends following a team evaluation, using XState for workflow-driven flows alongside Redux, React Query, Valtio, and Context. Ship every feature behind LaunchDarkly and Datadog flags, and build AI development tooling alongside product work: MCP integrations, reusable agent skills, and repository-level agent rules. Canadian citizen; available for remote work across Canada.

Technical skills

Languages and frameworks: TypeScript, JavaScript, React, Remix (SSR), Node.js

State and data: XState, Redux, React Query, Valtio, React Context, GraphQL (Apollo), REST

Design systems and UI: Storybook, Radix UI, Material UI, React Spectrum, Stitches, semantic HTML, responsive UI

Testing: Vitest, Jest, React Testing Library

Build and delivery: Vite, Docker, GitHub Actions, LaunchDarkly, Datadog, Lighthouse, Git

AI-assisted engineering: Claude Code, Cursor, Model Context Protocol (MCP), agent skills, AGENTS.md and project rules, custom slash commands, ChatGPT, Gemini

Professional experience

Senior Frontend Developer

ASICS Apps (Race Roster) | London, Ontario | Nov 2021 - Present

- Built the frontend of a standalone event-management admin platform from scratch after the monolith was split, selecting the stack (React, TypeScript, Vite, Material UI, Apollo GraphQL) and owning the architecture.
- Built a shared component library from the ground up and maintain a 40+ component library and Storybook that standardize UI patterns and component documentation.
- Implemented state management across microfrontends following a team evaluation, applying XState to workflow-driven flows and Redux, React Query, Valtio, and React Context where each fit better.
- Ship every feature behind LaunchDarkly and Datadog feature flags, using flag variations and context rules to control staged rollout and audience targeting.
- Developed server-rendered React applications with Remix and Vite, and monitor runtime performance with Lighthouse and Datadog.
- Maintain frontend test coverage with Vitest, Jest, and React Testing Library across complex UI workflows.
- Established AI-assisted development workflows with Claude Code and Cursor, authoring repository-level agent guidance in AGENTS.md and project rules that define architecture boundaries, coding conventions, validation commands, and security constraints.
- Built reusable agent skills for database migrations, API development, test creation, and releases, and integrated agents with development context through MCP under least-privilege access; adopted by teammates.
- Review code, contribute to frontend architecture decisions, onboard new developers, and implement Figma-based designs in collaboration with designers ahead of final comps.

Web Developer

binnj, inc. | London, Ontario | Jan 2019 - Nov 2021

- Built single-page applications from scratch with React, React Router, and Redux, and maintained and extended existing AngularJS applications.
- Ran client-facing proofs of concept to test UX changes before build, supporting platform adoption.
- Developed map-based data visualizations with the Google Maps API for location-driven features.
- Managed version control and continuous integration with Git and GitLab.

Full Stack Web Developer

Sport-Travel Inc. | London, Ontario | Sep 2017 - Dec 2018

- Built RESTful API endpoints with Node.js and Express, consumed by Vue.js web and mobile clients.
- Integrated Stripe for payment processing.
- Optimized CRUD operations using Knex.js over MySQL and PostgreSQL.

Project Management Consultant

Prosperi Technology | Vitoria, Brazil | Aug 2012 - Mar 2016

- Delivered enterprise project-management implementations on the Microsoft PPM suite, generating \$160,000+ in revenue and reducing client change requests by 33% through structured risk and issue management.
- Trained 1,000+ professionals in project-management software, and taught project management concurrently at UCL - Faculdade do Centro Leste (2014-2016).

Selected projects

Nami - Native macOS file manager built with Tauri 2. Provides dual-pane browsing, a synced terminal, git status, and remote hosts in a single native window.

Forma - Client-management application for personal trainers, built with TypeScript. In active development.

Education

Fanshawe College - Internet Applications and Web Development. London, ON. Sep 2016 - Apr 2018.

Vila Velha University - MBA, Project Management. Vitoria, Brazil. Mar 2007 - Dec 2008.

Vila Velha University - BBA, Business Management. Vitoria, Brazil. Aug 2001 - Dec 2006.
